

ENB Financial Corp 401(k) Savings Plan Notice of Qualified Default Investment Alternative

You are receiving this notice as a result of your ENB Financial Corp 401(k) Savings Plan ("Plan") transitioning to Fidelity Investments®. Under the Plan, any contributions for which you do not provide investment direction will be invested in the Plan's designated default investment option.

The Fidelity Freedom® Fund Class K6 will become the Plan Designated default investment option in the Plan effective December 1, 2022. Fund descriptions are provided below. Please refer to your Transition Guide for detailed information on all of your Plan's investment options, and details regarding the transition to Fidelity Investments.

You have the right under the Plan to direct the investment of your existing balances, which includes contributions and any earnings on those contributions, and your future contributions to any of the Plan's available investment options. In the event that you have not made an investment election or the Plan Sponsor has not provided direction for a given contribution, it will be invested into the Plan's designated default investment option, the Fidelity Freedom® Fund Class K6. If your contributions are initially invested in the designated default investment option, you have the right to transfer out of the designated default investment option to another investment option.

Eligible participants who do not enroll themselves in the Plan are automatically enrolled, unless they elect not to participate pursuant to the Plan's "opt-out process". If you are automatically enrolled, before-tax contributions are made on your behalf to the Plan at a rate of 3.0% of each type of eligible compensation, and have been, or will be invested in the Plan designated default investment option. You have the right to change your contribution percentage, as well as elect to discontinue contributions to the Plan altogether.

If you are automatically enrolled in the Plan you are also automatically enrolled in an annual increase program (AIP), which automatically increases the percentage of your contribution to the Plan annually up to 5.0% maximum, your Plan's established AIP Cap. You may also change the amount of your automatic increase amount, (but not less than 1%) or unenroll from AIP at any time. If you are eligible for this provision details will be provided under separate cover.

The Fidelity Freedom® Fund Class K6 used as the Plan designated default investment option are based on the assumption that the participant will retire at age 65. Please use the chart below, decided by your plan sponsor, to determine in which Fidelity Freedom® Fund Class K6 your future contributions will be directed, based on your date of birth at Fidelity Investments.

DATE OF BIRTH	FUND NAME	TICKER SYMBOL	GROSS EXPENSE RATIO AS OF September 26, 2022
1937 and before	Fidelity Freedom® Income Fund Class K6	FYTKX	0.37%

To obtain information about other plan investment options, please log on to NetBenefits® at www.netbenefits.com or call **800-835-5097** to speak to a representative. You may also make changes to your investment elections for future contributions and/or exchange all or a portion of your existing balance into other options available under the Plan via NetBenefits or by phone. We encourage you to review your investment mix and deferral percentage and update as appropriate.

Fidelity Freedom® 2005, 2010, 2015, 2020 Fund Class K6

Ticker: FITKX, FOTKX, FPTKX, FATKX

Objective: Seeks high total return until its target retirement date. Thereafter, the fund's objective will be to seek high current income and, as a secondary objective, capital appreciation.

Strategy: Designed for investors who anticipate retiring in or within a few years of the fund's target retirement year at or around age 65. Investing in a combination of Fidelity U.S. equity funds, international equity funds, bond funds, and short-term funds (underlying Fidelity funds). Allocating assets among underlying Fidelity funds according to a "neutral" asset allocation strategy that adjusts over time until it reaches an allocation similar to that of the Freedom Income Fund approximately 10 to 19 years after the target year. Ultimately, the fund will merge with the Freedom Income Fund. Fidelity Management & Research Company LLC (the Adviser) may modify the fund's neutral asset allocations from time to time when in the interests of investors. Buying and selling futures contracts (both long and short positions) in an effort to manage cash flows efficiently, remain fully invested, or facilitate asset allocation. Through an active asset allocation strategy, the Adviser may increase or decrease asset class exposures relative to the neutral asset allocations by up to 10 percentage points for equity, bond and short-term funds to reflect the Adviser's market outlook, which is primarily focused on the intermediate term.

Risk: Investment performance of the Fidelity Freedom Fund products depends on the performance of the underlying investment options and on the proportion of the assets invested in each underlying investment option. The investment risk of each Fidelity Freedom Fund changes over time as its asset allocation changes. These risks are subject to the asset allocation decisions of the Investment Adviser. Pursuant to the Adviser's ability to use an active asset allocation strategy, investors may be subject to a different risk profile compared to the fund's neutral asset allocation strategy shown in its glide path. The funds are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, commodity-linked and foreign securities. Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly. No target date fund is considered a complete retirement program and there is no guarantee any single fund will provide sufficient retirement income at or through retirement. Principal invested is not guaranteed at any time, including at or after the funds' target dates.

Short-term redemption fee: None

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

On June 7, 2017, an initial offering of the Fidelity Freedom K6 class took place. Returns and expenses prior to that date are those of the Freedom (retail) class. Had K6 class expenses been reflected in the returns shown, total returns would have been higher.

Fidelity Freedom® 2025, 2030, 2035, 2040, 2045, 2050, 2055, 2060 Fund Class K6

Ticker: FDTKX, FGTKX, FWTKX, FHTKX, FJTKX, FZTKX, FCTKX, FVTKX

Fidelity Freedom® Income Fund Class K6

Ticker: FYTKX

Objective: Seeks high current income and, as a secondary objective, capital appreciation.

Strategy: Investing in a combination of Fidelity U.S. equity funds, international equity funds, bond funds, and short-term funds (underlying Fidelity funds). Allocating assets among underlying Fidelity funds according to a stable "neutral" asset allocation strategy (approximately 11% in domestic U.S. equity funds, 8% in international equity funds, 43% in U.S. investment grade bond funds, 5% in international bond funds, 3% in long-term treasury bond funds, 20% in inflation-protected bond funds, and 10% in short-term funds) The Adviser may modify the fund's neutral asset allocations from time to time when in the interests of shareholders. Buying and selling futures contracts (both long and short positions) in an effort to manage cash flows efficiently, remain fully invested, or facilitate asset allocation. Through an active asset allocation strategy, the Adviser may increase or decrease asset class exposures relative to the neutral asset allocations by up to 10 percentage points for equity, bond and short-term funds to reflect the Adviser's market outlook, which is primarily focused on the intermediate term.

Risk: The fund is subject to risks resulting from the asset allocation decisions of the Investment Adviser. Pursuant to the Adviser's ability to use an active asset allocation strategy, investors may be subject to a different risk profile compared to the fund's neutral asset allocation strategy shown in its glide path. The fund is subject to the volatility of the financial markets, including that of equity and fixed income investments. Fixed income investments entail issuer default and credit risk, inflation risk, and interest rate risk (as interest rates rise, bond prices usually fall and vice versa). This effect is usually more pronounced for longer-term securities. Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly. No target date fund is considered a complete retirement program and there is no guarantee any single fund will provide sufficient retirement income at or through retirement. Principal invested is not guaranteed at any time, including at or after the funds' target dates.

Short-term redemption fee: None

Before investing in any mutual fund, consider the investment objectives, risks, charges, and expenses. Contact Fidelity for a prospectus or, if available, a summary prospectus containing this information. Read it carefully.

In the event of a discrepancy between this notice and the terms of the Plan, the plan document will govern.

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percentage of the fund's total net assets. Expense ratios change periodically and are drawn from the fund's prospectus. For more detailed fee information, see the fund prospectus or annual or semiannual reports.
